Vince Onochie

Group email: leciej@uvic.ca

WHY SHOULD I GET GOT IT?

- In brainstorming, we often forget many valuable ideas
- Its difficult to keep track of who says what in group meetings
- Highlighting similar ideas can offer brevity
- Ideas in writing are more easily compared and assessed

Have you ever started saying something, then gotten sidetracked and forgot your train of thought?

Do you find that brainstorm sessions often lose most of their worth once you leave because ideas are forgotten?

Got It aims to reduce your lost ideas, help you develop the useful ones, and make your group work more productive and successful

WHO ARE THE TARGET USERS?

Business Users

- Useful for business meetings, engineering teams
- Collaboration across offices
- Tracks user participation
- Offers administration features

Casual Users

- Useful for brainstorm sessions during group projects
- Self study notes for future reference
- To do lists
- Group discussions

WHAT IS GOT IT? I DON'T GET IT

- Dictation software that tracks who is speaking and what they are saying
- Splits and combines ideas into relevant combinations
- Combinations can later be adjusted, added and removed manually later
- Built for small group collaborations as well as business applications
